

Landscape Services- ATO Benchmarks

Businesses in the industry provide outdoor landscape construction services for residential, commercial and public premises.

Performance Benchmarks

These benchmarks use information reported on tax returns and activity statements for the 2019-2020 financial year, and are updated each year. This is the most current data.

The benchmarks show ranges of business income to business expenses that you can use to compare your performance against similar businesses in your industry.

Key Benchmark Range

Generally, you should fall within the key benchmark range for your particular annual turnover.

Falling outside the key benchmarks for your industry may indicate your business has room for improvement.

It may also be worthwhile checking you reported all income and accounted for any trading stock you may have used for private purposes, as these can affect your results. Certain businesses can use amounts we accept as estimates, check if they are available for you.

Landscape Services- ATO Benchmarks

2019-20 Financial Year

Key benchmark range	Annual turnover range		
	\$50,000 - \$200,000	\$200,001 - \$500,000	More than \$500,000
